

# Element.CreateSectionBefore()

## Description

Creates and returns a [Section](#) object that represents a new section at the beginning of this Element.

**C#**

```
public virtual Section CreateSectionBefore()
```

**vb.net**

```
Public Overridable Function CreateSectionBefore() As Section
```

## Returns

A [Section](#) object that represents a new section at the beginning of this Element.

## Examples

**C#**

```
Section sect = e.CreateSectionBefore();
```

**vb.net**

```
Dim sect As Section = e.CreateSectionBefore()
```
