

Document.UseWidowControl

Description

Sets or returns a `boolean` representing if widow control is in effect for this `Document`.

C#

```
public boolean UseWidowControl{ get; set; }
```

vb.net

```
Public Property UseWidowControl() As Boolean
```

Remarks

The default value for a new `Document` is `false`.

Examples

C#

```
//--- Return UseWidowControl
    bool useWidowControl = oDocument.UseWidowControl;

    //--- Set UseWidowControl
    oDocument.UseWidowControl = true;
```

vb.net

```
'--- Return UseWidowControl
    Dim useWidowControl As Boolean = oDocument.UseWidowControl

    '--- Set UseWidowControl
    oDocument.UseWidowControl = True
```
