

PageSetup.PrintOrder

Description

Sets or returns the order in which data is numbered and printed when it does not fit on one page. The default order is down-then-over.

(This is not supported for charts.)

C#

```
<p> public PagePrintOrder PrintOrder{ get; set; }</p>
```

vb.net

```
<p>Public Property PrintOrder() As PagePrintOrder</p>
```

Examples

C#

```
//--- Get PrintOrder
    PageSetup.PagePrintOrder order = ps.PrintOrder;

    //--- Set PrintOrder
    ps.PrintOrder = PageSetup.PagePrintOrder.OverThenDown;
```

vb.net

```
'--- Get PrintOrder
    Dim order As PageSetup.PagePrintOrder = ps.PrintOrder

    '--- Set PrintOrder
    ps.PrintOrder = PageSetup.PagePrintOrder.OverThenDown
```
