

# Cell.Value

## Description

Sets or returns a cell value. Empty cells will return either null or empty string.

**C#**

```
public System.Object Value{ get; set; }
```

**vb.net**

```
Public Property Value() As Object
```

## Examples

**C#**

```
//--- Get Value  
Object cellValue = cellA1.Value;  
  
//--- Set Value  
cellA1.Value = "value";
```

**vb.net**

```
'--- Get Value  
Dim cellValue As Object = cellA1.Value  
  
'--- Set Value  
cellA1.Value = "value"
```
