

ParagraphFormatting.WidowControl

Description

Sets or returns a boolean representing if Word will use Widow Control for a paragraph. When set to true, Word will not print the last line of a paragraph by itself at the top of a page (widow) or the first line of a paragraph by itself at the bottom of a page (orphan).

C#

```
public boolean WidowControl{ get; set; }
```

vb.net

```
Public Property WidowControl() As Boolean
```

Remarks

The default value for a new paragraph is `true`.

MS Word equivalent: Format menu > Paragraph... > Line and Page Breaks tab > Pagination section > Widow/Orphan control

Examples

C#

```
//--- Return WidowControl  
bool widowControl = oParagraphFormatting.WidowControl;  
  
//--- Set WidowControl  
oParagraphFormatting.WidowControl = false;
```

vb.net

```
'--- Return WidowControl  
Dim widowControl As Boolean = oParagraphFormatting.WidowControl  
  
'--- Set WidowControl  
oParagraphFormatting.WidowControl = False
```
