HTMLToWord.FormatElementDelegate

Description

Type for user-defined delegate method called by HTMLToWord after inserting an element.

C#

```
<p> public delegate void
FormatElementDelegate(SoftArtisans.OfficeWriter.WordWriter.Element
newlyInsertedElement, System.Xml.XmlNode node);</p>
```

vb.net

```
<p>Public Delegate Sub FormatElementDelegate(ByVal newlyInsertedElement As
SoftArtisans.OfficeWriter.WordWriter.Element, ByVal node As System.Xml.XmlNode)</p>
```
