

Employee Training

The *New Employee Training* is a presentation for a new employee orientation. It includes information such as company history and job expectations. This sample consists of three parts that demonstrate the basics of designing a presentation with PowerPointWriter. By the end of this sample you will be able to create a presentation that takes advantage of the features of both PowerPointTemplate and PowerPointApplication.

This sample focuses on importing basic text, including multiple rows of data, and using RepeatSlide behavior.

Employee Training Tutorials:

- [Part 1 - Importing Data](#)
 - Getting started with data markers, importing data, importing images, and setting up a basic template file.
- [Part 2 - The Continue Modifier](#)
 - Importing data onto multiple slides, and other uses of the *Continue* modifier.
- [Part 3 - Copy Slide](#)
 - Passing between the Template and Application objects and using the Slide Data Binding Property.

The *Project Proposal* sample C# code is available for download in [PowerPointWriter_BasicTutorials.zip](#)
