

PowerPointApplication.Open(PowerPointWriter.PowerPointTemplate)

Description

Opens a presentation form a PowerPoint Template.

C#

```
public void Open(PowerPointWriter.PowerPointTemplate powerPointTemplate)
```

vb.net

```
Public Sub Create(ByVal powerPointTemplate As PowerPointWriter.PowerPointTemplate)
```

Parameters

powerPointTemplate

An instance of a PowerPointTemplate.

Returns

A [Presentation](#) instance.

Examples

C#

```
PowerPointTemplate pptt = new PowerPointTemplate();

//--- Do something with template here

PowerPointApplication ppta = new PowerPointApplication();
ppta.Open(pptt);
```

vb.net

```
Dim pptt As New PowerPointTemplate()  
  
'--- Do something with template here  
  
Dim ppta As New PowerPointApplication()  
ppta.Open(pptt)
```
