

Worksheet.DeleteRows(Int32, Int32)

Description

Deletes a specified number of rows and its contents from the worksheet. Rows below the deleted rows will be moved up.

C#

```
public void DeleteRows(int rowNumber, int rowCount)
```

vb.net

```
Public Sub DeleteRows(ByVal rowNumber As Integer, ByVal rowCount As Integer)
```

Parameters

rowNumber

The 0-based number of the row to remove.

rowCount

The number of the rows to remove.

Examples

C#

```
ws.DeleteRows(70, 500);
```

vb.net

```
ws.DeleteRows(70, 500)
```
