

# Comment.GetCharacters(Int32)

## Description

Returns a [CharacterRun](#) object representing a range of characters within the comment text. Use this to set the font on specified characters within the text.

**C#**

```
public virtual CharacterRun GetCharacters(int startIndex)
```

**vb.net**

```
Public Overridable Function GetCharacters(ByVal startIndex As Integer) As CharacterRun
```

## Parameters

### ***startIndex***

The 0-based character position at which to begin the character run.

## Returns

A `CharacterRun` object representing a range of characters within the comment text.
