

DataValidation.SetAllowedType(DataValidation.ValidationType, DataValidation.ComparisonType, Object, Object)

Description

Sets the allowed data type, comparison type, and minimum and maximum values to use when validating a cell entry.

C#

```
public void SetAllowedType(ValidationType allowedType, ComparisonType comparison,
    System.Object minimumValue, System.Object maximumValue)
```

vb.net

```
Public Sub SetAllowedType(ByVal allowedType As ValidationType, ByVal comparison As
    ComparisonType, ByVal minimumValue As Object, ByVal maximumValue As Object)
```

Parameters

allowedType

The data type allowed in the cell.

comparison

The comparison used to validate the cell's value.

minimumValue

A primitive or Date representing the cell's maximum value.

maximumValue

A primitive or Date representing the cell's minimum value.
