

# Workbook.CreateCopyPasteProperties(CopyPasteProperties.CopyPasteType)

## Description

Creates a [CopyPasteProperties](#) object with the specified data type properties set.

### C#

```
public CopyPasteProperties CreateCopyPasteProperties(CopyPasteType typeMask)
```

### vb.net

```
Public Function CreateCopyPasteProperties(ByVal typeMask As CopyPasteType) As  
CopyPasteProperties
```

## Parameters

### *typeMask*

A CopyPasteProperties constant value indicating the types of data to copy from an external worksheet.

## Returns

A CopyPasteProperties object.

## Remarks

This object is used when copying data from an external worksheet.

Used with the [Worksheet.CopyPaste](#) method of the [Worksheet](#).

## Examples

### C#

```
CopyPasteProperties properties =  
    ws.CreateCopyPasteProperties(  
        CopyPasteProperties.ValuesOnly);
```

**vb.net**

```
Dim properties As CopyPasteProperties = _  
    ws.CreateCopyPasteProperties( _  
        CopyPasteProperties.ValuesOnly)
```
