

Pictures.CreatePicture(System.IO.Stream, Anchor)

Description

Creates a new [Picture](#) object from an existing image.

C#

```
public Picture CreatePicture(System.IO.Stream pictureStream, Anchor position)
```

vb.net

```
Public Function CreatePicture(ByVal pictureStream As System.IO.Stream, ByVal position  
As Anchor) As Picture
```

Parameters

pictureStream

A stream containing data for a JPEG, PNG, BMP, or GIF formatted image. The calling application is responsible for closing this stream.

position

The position to place the upper-left corner of the new picture.

Returns

A `Picture` object.
