

# Area.BorderAround

## Description

Returns a [Border](#) object that represents a border around the area. Use the `Border` object returned to set the appearance of the border.

**C#**

```
public Border BorderAround{ get; }
```

**vb.net**

```
Public ReadOnly Property BorderAround() As Border
```

## Examples

**C#**

```
Border bordr = a.BorderAround;
```

**vb.net**

```
Dim bordr As Border = a.BorderAround
```
