Area.AllColumnWidths

Description

Sets the width - in points (1/72 of an inch) - of all columns in the Area. When converted to character widths, this must be a value that is between 0 - 255.

C#

```
public double AllColumnWidths{ set; }
```

vb.net

```
Public WriteOnly Property AllColumnWidths() As Double
```

Examples

C#

```
a.AllColumnWidths = 100;
```

vb.net

```
a.AllColumnWidths = 100
```
