

PivotTableField.DisplaySubtotalsAtTop

Introduced in build 8.4

Description

Sets or returns whether or not the subtotals for each group should be displayed at the top or the bottom.

C#

```
public bool DisplaySubtotalsAtTop{ get; set; }
```

vb.net

```
Public Property DisplaySubtotalsAtTop() As bool
```

Remarks

This can be set on any type of PivotTable field (data field, page field, row label, or column label) but will only have an effect when on a row label or column label.

This property cannot be set on `ValuesLabels` and will return null. You can check if a PivotTable field is values label with the [IsValuesLabel](#) property.
