# Worksheet.CopyPaste(Cell, Area)

# **Description**

Copies an area of cells from another Worksheet to cells in this worksheet.

C#

public Area CopyPaste(Cell destCell, Area sourceArea)

#### vb.net

Public Function CopyPaste(ByVal destCell As Cell, ByVal sourceArea As Area) As Area

### **Parameters**

#### destCell

A Cell indicating the upper-left cell of the destination area.

#### sourceArea

An area from the source workbook from which to copy.

### **Returns**

An Area object representing the set of cells populated with the copied values.

## **Remarks**

The copied data will <u>overwrite</u> the contents of the cells in this worksheet. The method behaves as if you had passed in CopyPasteProperties object initialized with CopyPasteType.All.

# **Examples**

```
//--- Open the workbook and worksheet from which we will copy cells.
Workbook sourceWb = xla.Open("MyDataSource.xls");
Worksheet sourceWs = sourceWb[0];

//--- Create the workbook and and get the worksheet
//--- into which we will paste cells.
Workbbok destWb = xla.Create("MyNewWorkbook");
Worksheet destWs = destWb[0];

//--- Define the area of cells to copy.
Area srcArea = sourceWs.CreateArea("A1:F20");

// Paste the data onto the destination worksheet.
// Copy all supported data types (excluding row height and column width).
Cell whereToPaste = destSheet["A1"];
destWs.CopyPaste(whereToPaste, srcArea);
```

#### vb.net

```
'--- Open the workbook and worksheet from which we will copy cells.

Dim sourceWb As Workbook = xla.Open("MyDataSource.xls")

Dim sourceWs As Worksheet = sourceWb(0)

'--- Create the workbook and and get the worksheet
'--- into which we will paste cells.

Dim destWb As Workbook = xla.Create("MyNewWorkbook")

Dim destWs As Worksheet = destWb(0)

'--- Define the area of cells to copy.

Dim srcArea As Area = sourceWs.CreateArea("A1:F20")

'--- Paste the data onto the destination worksheet.
'--- Copy all supported data types (excluding row height and column width).

Dim whereToPaste As Cell = destSheet("A1")

destWs.CopyPaste(whereToPaste, srcArea)
```
