

Worksheet.CreateArea(Int32, Int32, Int32, Int32)

Description

Defines a rectangular [Area](#) of cells in the worksheet.

C#

```
public Area CreateArea(int firstRow, int firstColumn, int numRows, int numColumns)
```

vb.net

```
Public Function CreateArea(ByVal firstRow As Integer, ByVal firstColumn As Integer,  
ByVal numRows As Integer, ByVal numColumns As Integer) As Area
```

Parameters

firstRow

0-based first row of the area.

firstColumn

0-based first column of the area.

numRows

Number of rows in the area. Maximum: 65536.

numColumns

Number of columns in the area. Maximum: 256.

Returns

An [Area](#) object.

Examples

C#

```
Area a = ws.CreateArea(4, 4, 15, 6);
```

vb.net

```
Dim a As Area = ws.CreateArea(4, 4, 15, 6)
```
