

Workbook.Unprotect()

Description

Removes protection from the workbook.

C#

```
public void Unprotect()
```

vb.net

```
Public Sub Unprotect()
```

Remarks

Calling `Unprotect` will remove both the workbook protection and workbook encryption. If you want to remove only one of those, call `Unprotect` and then reset either the protection or encryption.

Examples

C#

```
wb.Unprotect();
```

vb.net

```
wb.Unprotect()
```
