

AutoFilter.Area

Introduced in build 8.3

Description

Sets or returns an [Area](#) object that represents the area of cells that the filter is applied to in the worksheet.

C#

```
public Area Area{ get; set; }
```

vb.net

```
Public Property Area() As Area
```

Examples

C#

```
//--- Get filter's Area  
Area filterArea = autoFilter.Area;  
  
//--- Set filter's Area  
autoFilter.Area = filterArea;
```

vb.net

```
'--- Get filter's Area  
Dim filterArea As Area = autoFilter.Area  
  
'--- Set filter's Area  
autoFilter.Area = filterArea
```
