

PivotTableField.NumberFormat

Introduced in build 8.4

Description

Sets or returns the number format string for the [PivotTableField](#).

C#

```
public System.String NumberFormat{ get; set; }
```

vb.net

```
Public Property NumberFormat() As String
```

Remarks

This property cannot be set on `ValuesLabels` and will return an empty string. You can check if a PivotTable field is a values label with the [IsValuesLabel](#) property.
