

ChartRegion.X

Description

Sets or returns the x coordinate of the upper left corner of the chart region, in units of 1/4000 of the chart area.

C#

```
public int X{ get; set; }
```

vb.net

```
Public Property X() As Integer
```

Remarks

For [SeriesDataLabel](#) and [Trendline](#) labels, the origin for the X coordinate is relative to the default location of the data label.

If a value is set that is outside the range of 0 through 4000 inclusive, the value will be adjusted to be within that range.
