

# Workbook.Unprotect()

## Description

Removes protection from the workbook.

**C#**

```
public void Unprotect()
```

**vb.net**

```
Public Sub Unprotect()
```

## Remarks

Calling `Unprotect` will remove both the workbook protection and workbook encryption. If you want to remove only one of those, call `Unprotect` and then reset either the protection or encryption.

## Examples

**C#**

```
wb.Unprotect();
```

**vb.net**

```
wb.Unprotect()
```
