ColumnProperties.WidthInChars

Description

Sets or returns the width of the column as a number of '0' characters in the font of the 'Normal' style. This must be a value between 0 - 255.

C#

```csharp
public double WidthInChars{ get; set; }
```

vb.net

```vbnet
Public Property WidthInChars() As Double
```

Remarks

While a cell can show more than 255 characters, a column may not exceed 255 characters in width.

Examples

C#

```csharp
double colWidth = colProps.WidthInChars;
colProps.WidthInChars = 20;
```

vb.net

```vbnet
Dim colWidth As Double = colProps.WidthInChars
colProps.WidthInChars = 20
```
