Worksheet.Item(Int32, Int32)

Description

Returns the cell at a specified row and column position. This property is an indexer for the Worksheet class.

C#

```
public Cell this[int rowNumber, int columnNumber] { get; }
```

vb.net

```
Public Default ReadOnly Property Item(ByVal rowNumber As Integer, ByVal columnNumber As Integer) As Cell
```

Parameters

rowNumber

The 0-based row number of the cell to retrieve.

columnNumber

The 0-based column number of the cell to retrieve.

Returns

A Cell object representing the cell at the specified position.

Examples

C#

```
        //--- Get Cell by index
        Cell cellA1 = ws[0,0];
```

vb.net

```
        '--- Get Cell by index
        Dim cellA1 As Cell = ws(0,0)
```
