

ChartText.GetCharacters(Int32, Int32)

Description

Returns a [CharacterRun](#) object representing a range of characters within the text. Use this to set a font on specified characters within the [ChartText](#) object.

(This has no meaning for [SeriesDataLabel](#) on a series, only for [SeriesDataLabel](#) on a data point.)

C#

```
public CharacterRun GetCharacters(int startIndex, int length)
```

vb.net

```
Public Function GetCharacters(ByVal startIndex As Integer, ByVal length As Integer) As CharacterRun
```

Parameters

startIndex

The character position at which to begin the character run.

length

The length of the character run.

Returns

A [CharacterRun](#) object representing a range of characters within the cell.
