

Workbook.Unprotect()

Description

Removes protection from the workbook.

C#

```
public void Unprotect()
```

vb.net

```
Public Sub Unprotect()
```

Remarks

Calling Unprotect will remove both the workbook protection and workbook encryption. If you want to remove only one of those, call Unprotect and then reset either the protection or encryption.

Examples

C#

```
wb.Unprotect();
```

vb.net

```
wb.Unprotect()
```
