

SeriesDataLabel.ContainsCategoryName

Description

Sets or returns whether series data labels will contain the category name (x value).

C#

```
public boolean ContainsCategoryName{ get; set; }
```

vb.net

```
Public Property ContainsCategoryName() As Boolean
```

Remarks

This defaults to false when creating a new Series.

The data label is considered disabled if this and [ContainsBubbleSize](#), [ContainsSeriesName](#), [ContainsValue](#), and [ContainsValueAsPercentage](#) are all false.

If the series category type is a scatter or bubble chart, then this property corresponds to the 'X Value' option under 'Label Contains' in Excel.
