

# Groups.Remove(Int32)

## Description

Removes the [Group](#) object at the specified 0-based position in the collection.

### C#

```
public void Remove(int position)
```

### vb.net

```
Public Sub Remove(ByVal position As Integer)
```

## Parameters

### *position*

The 0-based index of the [Group](#) object to remove.

## Exceptions

### *ArgumentOutOfRangeException*

Calling `Remove` with a shape group position less than 0 or greater than or equal to the number of shape groups will throw an `ArgumentOutOfRangeException`.
