

Groups.Remove(Int32)

Description

Removes the [Group](#) object at the specified 0-based position in the collection.

C#

```
public void Remove(int position)
```

vb.net

```
Public Sub Remove(ByVal position As Integer)
```

Parameters

position

The 0-based index of the Group object to remove.

Exceptions

ArgumentOutOfRangeException

Calling Remove with a shape group position less than 0 or greater than or equal to the number of shape groups will throw an `ArgumentOutOfRangeException`.
