

ParagraphFormatting.GetIndent(ParagraphFormatting.IndentLocation)

Description

Returns an `int` representing the indent of the paragraph in twips.

C#

```
public int GetIndent(IndentLocation location)
```

vb.net

```
Public Function GetIndent(ByVal location As IndentLocation) As Integer
```

Parameters

indentLocation

A [ParagraphFormatting.IndentLocation](#) representing the indent location for which to get the indent.

Returns

An `int` that represents the indent of the paragraph in twips.

Examples

C#

```
int indent = oParagraphFormatting.GetIndent(  
    ParagraphFormatting.IndentLocation.FirstLine);
```

vb.net

```
Dim indent As Integer = oParagraphFormatting.GetIndent( _  
    ParagraphFormatting.IndentLocation.FirstLine)
```
