

# PowerPointTemplate.ClearDataSources()

## Description

Clears the data source associated with the [PowerPointTemplate](#) object. This allows the same template to be re-used with multiple, different sets of data.

**C#**

```
<p>public void ClearDataSources()</p>
```

**vb.net**

```
<p>Public Sub ClearDataSources()</p>
```

## Examples

\$body

**C#**

```
pptt.ClearDataSources();
```

**vb.net**

```
pptt.ClearDataSources()
```

## Examples
