

ExcelApplication.LicenseKey

Description

The property sets or returns the license key that enables ExcelWriter. The key is stored in the registry. It contains information about ExcelWriter, including product name, platform, and version.

C#

```
public System.String LicenseKey{ get; set; }
```

vb.net

```
Public Property LicenseKey() As String
```

Remarks

For assistance with licensing issues, contact SoftArtisans Technical Services (<http://support.softartisans.com/>).

Examples

C#

```
//--- Get LicenseKey
string key= xla.LicenseKey;

//--- Set LicenseKey
xla.LicenseKey = "XXXXXX-XXXX-XXXX-XXXXXX";
```

vb.net

```
'--- Get LicenseKey
Dim keyAs String = xla.LicenseKey

'--- Set LicenseKey
xla.LicenseKey = "XXXXXX-XXXX-XXXX-XXXXXX"
```
