# ChartSettings3D.UseRightAngleAxes

## Description

Sets or returns whether the axes will be at right angles. If `true`, `DistanceFromEyeToChart` will have no effect.

```
C#

 public boolean UseRightAngleAxes{ get; set; }
```

```
vb.net

 Public Property UseRightAngleAxes() As Boolean
```

## Remarks

`UseRightAngleAxes` is `false` by default for most chart types. The exception is Bar and Column charts (except for `Column3D`), where it is `true`.
