

DocumentProperties.Author

Description

Sets or returns the author of the spreadsheet. The author property can be used to search for an Excel file.

C#

```
<p> public System.String Author{ get; set; }</p>
```

vb.net

```
<p>Public Property Author() As String</p>
```

Examples

C#

```
//--- Get Application
    string author = docProps.Author;

    //--- Set Author
    docProps.Author = "J. Smith";
```

vb.net

```
'--- Get Application
    Dim author As String = docProps.Author

    '--- Set Author
    docProps.Author = "J. Smith"
```
