

Worksheet.GetColumnProperties(Int32)

Description

Returns a [ColumnProperties](#) object representing the column specified by index.

C#

```
public ColumnProperties GetColumnProperties(int columnIndex)
```

vb.net

```
Public Function GetColumnProperties(ByVal columnIndex As Integer) As ColumnProperties
```

Parameters

columnIndex

The 0-based index of the column.

Returns

A [ColumnProperties](#) object representing the specified column.

Examples

C#

```
ColumnProperties colProps = ws.GetColumnProperties(0);
```

vb.net

```
Dim colProps As ColumnProperties = ws.GetColumnProperties(0)
```
