

Area.AllColumnWidthsInChars

Description

Sets or returns the width of all columns in this Area as a number of '0' characters in the font of the 'Normal' style. This must be a value between 0 - 255.

C#

```
public double AllColumnWidthsInChars{ set; }
```

vb.net

```
Public WriteOnly Property AllColumnWidthsInChars() As Double
```

Examples

C#

```
a.AllColumnWidthsInChars = 100;
```

vb.net

```
a.AllColumnWidthsInChars = 100
```
