Cell.GetCharacters(Int32, Int32)

Description

Returns a CharacterRun object representing a range of characters within the cell. Use this method to set the font on specified characters within the cell.

C#

```csharp
public CharacterRun GetCharacters(int startIndex, int length)
```

---

vb.net

```vbnet
Public Function GetCharacters(ByVal startIndex As Integer, ByVal length As Integer) As CharacterRun
```

Parameters

startIndex

The character position at which to begin the character run.

length

The length of the character run.

Returns

A `CharacterRun` object representing a range of characters within the cell.

Examples

C#

```csharp
CharacterRun charRun = cellA1.GetCharacters(0, 6);
```

---

vb.net

```vbnet
Dim charRun As CharacterRun = cellA1.GetCharacters(0, 6)
```
