

ChartRegion.BorderLine

Description

Returns the border around the chart region.

C#

```
public ChartLine BorderLine{ get; }
```

vb.net

```
Public ReadOnly Property BorderLine() As ChartLine
```

Remarks

By default, the borderline of [Chart.ChartArea](#) for new charts are visible. All other border lines for all other components of a chart are not visible by default.

If a default borderline is visible, which is the case for Chart area borderline, the default configuration for the line is:

- [Color](#): [Color.SystemColorAutomaticLine](#)
- [Style](#): [ChartLine.LineStyle.Solid](#)
- [Weight](#): [ChartLine.LineWeight.Narrow](#)

If a default borderline is invisible, as is the case with legends, data labels, titles, and axes, the defaults are as follows:

- [Color](#): [Color.SystemColor.Black](#)
- [Style](#): [ChartLine.LineStyle.None](#)
- [Weight](#): [ChartLine.LineWeight.Narrow](#)
