

TableCell.FirstMerged

Description

Returns or sets a `boolean` that represents if this is the first cell in a group of horizontally merged cells. The first cell will contain all the content.

C#

```
public boolean FirstMerged{ get; set; }
```

vb.net

```
Public Property FirstMerged() As Boolean
```

Examples

C#

```
//--- Return FirstMerged
    bool merged = cell.FirstMerged;

    //--- Set FirstMerged
    cell.FirstMerged = true;
```

vb.net

```
'--- Return FirstMerged
    Dim merged As Boolean = cell.FirstMerged

    '--- Set FirstMerged
    cell.FirstMerged = True
```

Examples
