PageSetup.PrintTitles

Description

Returns the Range of cells that contains the print titles. This range will contain up to two Area s, one for print title rows and another for the print title columns. These are the rows and columns that will be repeated on each printed page.

(This is not supported for charts.)

C#

```csharp
public Range PrintTitles{ get; }
```

vb.net

```vbnet
Public ReadOnly Property PrintTitles() As Range
```

Examples

C#

```csharp
Range prntTitles = ps.PrintTitles;
```

vb.net

```vbnet
Dim prntTitles As Range = ps.PrintTitles
```
