

PageSetup.PrintAsDraft

Description

Sets or returns whether Excel will print the worksheet in draft quality. This can be used to reduce printing time. When this is set to `true`, Excel does not print gridlines and most graphics. This is set to `false` by default.

C#

```
<p> public boolean PrintAsDraft{ get; set; }</p>
```

vb.net

```
<p>Public Property PrintAsDraft() As Boolean</p>
```

Examples

C#

```
//--- Get PrintAsDraft
    bool draft = ps.PrintAsDraft;

    //--- Set PrintAsDraft
    ps.PrintAsDraft = true;
```

vb.net

```
'--- Get PrintAsDraft
    Dim draft As Boolean = ps.PrintAsDraft

    '--- Set PrintAsDraft
    ps.PrintAsDraft = True
```
