

CopyPasteProperties.CopyFormatting

Description

A boolean value indicating whether or not to copy cell formatting. Cell formatting includes font, color, number formatting, fill color, fill pattern and borders.

C#

```
public boolean CopyFormatting{ get; set; }
```

vb.net

```
Public Property CopyFormatting() As Boolean
```

Examples

C#

```
//--- Is the property object set to copy cell formatting?  
    boolean willCopyFormatting = copyPasteProperties.CopyFormatting;  
  
    //--- Set the property object to copy cell formatting.  
    copyPasteProperties.CopyFormatting = true;
```

vb.net

```
'--- Is the property object set to copy cell formatting?  
    Dim willCopyFormatting As Boolean = copyPasteProperties.CopyFormatting  
  
    '--- Set the property object to copy cell formatting.  
    copyPasteProperties.CopyFormatting = True
```
