

Table.AddColumn(Int32)

Description

Adds a specified number of columns to the horizontal end of the table.

C#

```
public void AddColumns(int numColumns)
```

vb.net

```
Public Sub AddColumns(ByVal numColumns As Integer)
```

Parameters

numColumns

The number of columns to add to the table.

Examples

C#

```
tbl.AddColumn(4);
```

vb.net

```
tbl.AddColumn(4)
```
