

# DocumentProperties.Keywords

## Description

Sets or returns keywords that can be used to search for the spreadsheet. In Excel, a file's keywords are displayed in the Summary page of the Properties sheet.

### C#

```
<p> public System.String Keywords{ get; set; }</p>
```

### vb.net

```
<p>Public Property Keywords() As String</p>
```

## Examples

### C#

```
//--- Get Keywords
    string keywords = docProps.Keywords;

    //--- Set Keywords
    docProps.Keywords = "ExcelWriter, WordWriter, OfficeWriter";
```

### vb.net

```
'--- Get Keywords
    Dim keywords As String = docProps.Keywords

    '--- Set Keywords
    docProps.Keywords = "ExcelWriter, WordWriter, OfficeWriter"
```
