# Workbook.NamedRanges

### **Description**

Returns the named ranges of the Workbook as an array of NamedObject objects as an IEnumerable collection. Though the named ranges are not returned in any particular order, they are iterable.

#### C#

public System.Collections.Generic.IEnumerable<NamedObject> NamedRanges{ get; }

#### vb.net

Public ReadOnly Property NamedRanges() As System.Collections.Generic.IEnumerable(Of NamedObject)

## **Examples**

#### C#

NamedObject[] ranges = wb.NamedRanges;

#### vb.net

Dim ranges as NamedObject() = wb.NamedRanges
