

DocumentProperties.Keywords

Description

Sets or returns keywords that can be used to search for the presentation. In PowerPoint, a file's keywords are displayed in the Summary page of the Properties sheet.

C#

```
<p> public System.String Keywords{ get; set; }</p>
```

vb.net

```
<p>Public Property Keywords() As String</p>
```

Examples

C#

```
//--- Get Keywords
    string keywords = docProps.Keywords;

//--- Set Keywords
    docProps.Keywords = "PowerPointWriter, OfficeWriter";
```

vb.net

```
'--- Get Keywords
    Dim keywords As String = docProps.Keywords

'--- Set Keywords
    docProps.Keywords = "PowerPointWriter, OfficeWriter"
```
