

Color.IsCustomColor

Description

Returns whether or not the color is a custom color.

C#

```
public boolean IsCustomColor{ get; }
```

vb.net

```
Public ReadOnly Property IsCustomColor() As Boolean
```

Remarks

For .xls files a custom color is a color that is not part of Excel's default color palette. For .xlsx files, a custom color is any color that has not been retrieved from the legacy palette (through [Palette.SetColorAt](#) or [Palette.GetColorAt](#)), and is not a system color.

Examples

C#

```
bool customColor = clr.IsCustomColor;
```

vb.net

```
Dim customColor As Boolean = clr.IsCustomColor
```
