

DataValidation.MinimumValue

Description

Sets or returns the minimum value that may be entered in a cell with a data validation rule.

C#

```
public System.Object MinimumValue{ get; set; }
```

vb.net

```
Public Property MinimumValue() As Object
```

Remarks

See object documentation for the ValidationType value type combinations accepted by this method. For ValidationTypes which do not support a minimum value, (DataValidation.ValidationType.AnyValue) this method will throw an exception.
