

Table.NumRows

Description

Returns an `int` representing the number of rows in the first row of this table.

C#

```
public int NumRows{ get; }
```

vb.net

```
Public ReadOnly Property NumRows() As Integer
```

Examples

C#

```
int numRows = oTable.NumRows;
```

vb.net

```
Dim numRows As Integer = oTable.NumRows
```
